Emp ID: 85010920

1. Fundamentals of Testing
2. Introduction to Requirements Engineering
3. Evolution and Type of Requirements
4. Types of Testing Techniques & Test Case Design
5. Testing throughout the Software Life Cycle
6. Software Testing Lifecycle

1. Evaluating testability of the requirements and system are a part of which phase:-

- A. Test Analysis and Design
- B. Test Planning and control
- C. **Test Implementation and execution**
- D. Evaluating exit criteria and reporting

2. Validation involves which of the following

- i. Helps to check the Quality of the Built Product
- ii. Helps to check that we have built the right product.
- iii. Helps in developing the product
- iv. Monitoring tool wastage and obsolescence.

- A. Options i, ii, iii, iv are true.
- B. **ii is true and i, iii, iv are false**
- C. i, ii, iii are true and iv is false
- D. iii is true and i, ii, iv are false.

3. Which of the following uses Impact Analysis most?

- A. Component testing
- B. Non-functional system testing
- C. User acceptance testing
- D. **Maintenance testing**

4. Functional system testing is:

- A. testing that the system functions with other systems
- B. testing that the components that comprise the system function together
- C. testing the end to end functionality of the system as a whole
- D. testing the system performs functions within specified response times

5. When what is visible to end-users is a deviation from the specific or expected behavior, this is called:

- A. an error
- B. a fault
- C. a failure
- D. a defect
- E. a mistake

6. Regression testing should be performed:

- v) every week
- w) after the software has changed
- x) as often as possible
- y) when the environment has changed
- z) when the project manager says

- A. v & w are true, x – z are false
- B. w, x & y are true, v & z are false
- C. w & y are true, v, x & z are false
- D. w is true, v, x y and z are false
- E. all of the above are true

7. IEEE 829 test plan documentation standard contains all of the following except:

- A. test items
- B. test deliverables
- C. test tasks
- D. test environment
- E. test specification

8. Testing should be stopped when:

- A. all the planned tests have been run

- B. time has run out
- C. all faults have been fixed correctly
- D. both A and C
- E. it depends on the risks for the system being tested

9. Non-functional system testing includes:

- A. testing to see where the system does not function properly
- B. testing quality attributes of the system including performance and usability
- C. testing a system feature using only the software required for that action
- D. testing a system feature using only the software required for that function
- E. testing for functions that should not exist

10. What is the purpose of test completion criteria in a test plan:

- A. to know when a specific test has finished its execution
- B. to ensure that the test case specification is complete
- C. to set the criteria used in generating test inputs
- D. to know when test planning is complete
- E. to plan when to stop testing

11. Which of the following is NOT a black box technique:

- A. Equivalence partitioning
- B. State transition testing
- C. LCSAJ
- D. Syntax testing
- E. Boundary value analysis

12. Beta testing is:

- A. Performed by customers at their own site
- B. Performed by customers at their software developer's site
- C. Performed by an independent test team
- D. Useful to test bespoke software
- E. Performed as early as possible in the lifecycle

13. The main focus of acceptance testing is:

- A. finding faults in the system
- B. testing the system with other systems
- C. testing for a business perspective

D. testing by an independent test team

14. The difference between re-testing and regression testing is

- A. re-testing is running a test again; regression testing looks for unexpected side effects
- B. re-testing looks for unexpected side effects; regression testing is repeating those tests
- C. re-testing is done after faults are fixed; regression testing is done earlier
- D. re-testing is done by developers, regression testing is done by independent testers

15. Which of the following is NOT part of system testing:

- A. business process-based testing
- B. performance, load and stress testing
- C. usability testing
- D. top-down integration testing

16. Which of the following is NOT included in the Test Plan document of the Test Documentation Standard:

- A. Test items (i.e. software versions)
- B. What is not to be tested
- C. Test environments
- D. Quality plans

17. Which of the following is not part of performance testing:

- A. Measuring response time
- B. Measuring transaction rates
- C. Recovery testing Download more sample papers at – istqbExamCertification.com
Download more sample papers at – istqbExamCertification.com
- D. Simulating many users

18. Error guessing is best used

- A. As the first approach to deriving test cases
- B. After more formal techniques have been applied
- C. By inexperienced testers
- D. Only by end users

19. Software testing activities should start

- A. as soon as the code is written
- B. during the design stage

- C. when the requirements have been formally documented
- D. as soon as possible in the development life cycle

20. A test design technique is a.

- A. process for selecting test cases
- B. a process for determining expected outputs
- C. a way to measure the quality of software
- D. a way to measure in a test plan what has to be done

21. Which of the following is not true about Software Validation?

- A. Validation ensures the product under development is as per the user requirements.
- B. Validation do not emphasizes on user requirements.
- C. Validation emphasizes on user requirements.
- D. Validation is carried out at the end of the SDLC.

22. How many types of software testing exist?

- A. 1
- B. 2
- C. 3
- D. 4

23. SRS stands for?

- A. System requirements specification
- B. System respond software
- C. Software respond system
- D. Software requirements specification

24. In which type of testing software is compiled as product and then it is tested as a whole?

- A. Integration Testing
- B. Acceptance Testing
- C. Regression Testing
- D. None of the above

25. Exhaustive testing is?

- A. always possible
- B. practically possible
- C. impractical but possible
- D. impractical and impossible

26. Test cases should uncover errors like

- A. Non-existent loop termination
- B. Comparison of different data types
- C. Incorrect logical operators or precedence
- D. All of the above

27. Which of the following is true about Corrective Maintenance?

- A. It includes modifications and updations done in order to correct or fix problems, which are either discovered by user or concluded by user error reports.
- B. It includes modifications and updations applied to keep the software product up-to date and tuned to the ever changing world of technology and business environment.
- C. It includes modifications and updates done in order to keep the software usable over long period of time.
- D. It includes modifications and updations to prevent future problems of the software.

28. Which of the following is not a type of maintenance?

- A. Adaptive Maintenance
- B. Preventive Maintenance
- C. Perfective Maintenance
- D. Performative Maintenance

29. What is failure?

- A. Deviation from expected result to actual result
- B. Defect in the software.
- C. Error in the program code.
- D. Fault in the system.

30. In how many categories software Maintenance is classified?

- A. 2
- B. 3
- C. 4
- D. 5

31. What type of software testing is generally used in Software Maintenance?

- A. Regression Testing
- B. System Testing
- C. Black-box testing
- D. White-box testing

32. Upper CASE tools are used in _____ stages of SDLC?

- A. planning
- B. analysis
- C. design
- D. All of the above

33. Which of the following tool is helpful in all the stages of SDLC?

- A. Central Repository
- B. Lower Case Tools
- C. Integrated Case Tools
- D. Upper Case Tools

34. Which testing includes testing software manually, i.e. without using any automated tool or any script?

- A. Automation Testing
- B. Client Testing
- C. Manual Testing
- D. All of the above

35. Which testing comes under manual testing?

- A. unit testing
- B. integration testing
- C. system testing
- D. All of the above

36. Which of the following is the first step in SDLC framework?

- A. Feasibility Study
- B. Requirement Gathering
- C. Communication
- D. System Analysis

37. Which of the following is not correct model in Software Development Paradigm?

- A. Waterfall Model
- B. P model
- C. Spiral Model
- D. V model

38. RAD stands for

- A. Rapid Application Development
- B. Required Application Development
- C. Rapid Application Developers
- D. Rapid Application Disposition

39. Which of the following is not correct model in Software Development Paradigm?

- A. Waterfall Model
- B. Prototype model
- C. Spiral Model
- D. V model

40. Waterfall model is not suitable for:

- A. Small projects
- B. Complex projects
- C. Accommodating changes
- D. Maintenance Projects

41. In the maintenance phase the product must be tested against previous test cases. This is known as _____ testing.

- A. Unit
- B. Regression
- C. Acceptance
- D. Integration

42. Which type of integration testing uses stubs?

- A. Top down testing
- B. Bottom up testing
- C. Both in top down and bottom up testing
- D. System testing

43. Which one of the following is a functional requirement?

- A. Maintainability
- B. Portability
- C. Business needs
- D. Reliability

44. What is the major drawback of using RAD Model?

A. Highly specialized & skilled developers/designers are required

B. Increases reusability of components

C. Encourages customer/client feedback

D. Increases reusability of components, Highly specialized & skilled developers/designers are required

45. The process to gather the software requirements from client, analyze and document them is known as _____.

A. Feasibility Study

B. Requirement Gathering

C. Requirement Engineering

D. System Requirements Specification

46. The goal of requirement engineering is to develop and maintain sophisticated and descriptive _____ document.

A. Feasibility Study

B. Requirement Gathering

C. Software Requirement Validation

D. System Requirements Specification

47. It is the process in which developers discuss with the client and end users and know their expectations from the software.

A. Requirements gathering

B. Organizing Requirements

C. Negotiation & discussion

D. Documentation

48. Which of the following is correct software metrics?

A. Complexity Metrics

B. Quality Metrics

C. Process Metrics

D. All of the above

49. In Design phase, which is the primary area of concern?

A. Architecture

B. Data

C. Interface

D. All of the above

50. Which of the following is true about Software Verification?

A. Verification ensures the product being developed is according to design specifications.

B. Verifications concentrates on the design and system specifications.

C. Both A and B

D. None of the above
